

SR 7 EXTENSION PROJECT FACTS

CONGESTION

The SR 7 extension is a vital addition to the network to alleviate the congestion which will continue to worsen due to existing and planned developments.

- a. There are limited north-south connections in the area
- b. The existing road network is not adequate
- c. The project will reduce cut through traffic in the residential streets of the acreage

ENVIRONMENT

The proposed road will not contaminate the city's water supply. The project design contains multiple layers of protection against pollution of the adjacent natural areas.

EMERGENCY

The proposed road will reduce emergency response times and facilitate hurricane evacuation.

COMMUNITY

The Department takes community feedback seriously. Based upon the concerns raised, the project has been changed significantly to reduce the footprint and the environmental impacts.
